The International Credit Cartel

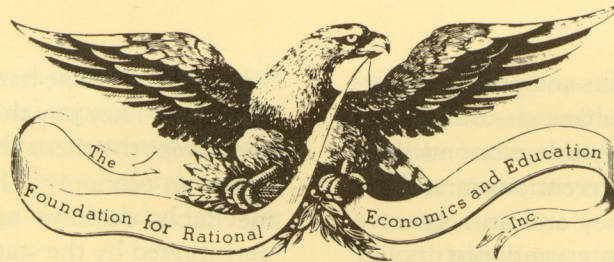

Congressman Ron Paul

It's part of human nature to resent power that has gravitated into the hands of a few. People have a natural antipathy toward monopolies and cartels that appear to do them economic injustice. Rarely is it

tional monopoly without enforceable government action.

Yet through deception and various government-concocted schemes, a very powerful international cartel

Intervention Leads to Socialism

by Ron Paul

Environmentalists profess a true love of nature; the more primitive it is the better. At times, however, their obsession with the primitive and the techniques they use are in conflict with healthy economic growth. Love of

tion behind it. Intervention by government contradicts the principle of equal rights and non-violence. Interventionists, although motivated for many reasons, claim their
