

Introduction to Slavic Reference

‘This guide is aimed at introducing you to the location and use of major bibliographies for Slavic studies. This is far too brief to cover more than a small portion of the vast world of bibliography and the thousands of research materials in this library. However, using the tools mentioned today can lead you to the other sources that you will need during your studies here. The following bibliographic list is arranged according to the way that we will walk through the library’ [Adapted from Murlin Croucher’s guide, Indiana University].
